

INSTALLATION DAIKO TAXI SERVICE

In effort to eliminate the risk of personnel driving while under the influence of alcohol. The Marine Corps Base Installation Safety and Base Telephone offices joined efforts in designing a direct dial phone line that will connect you straight to a Daiko taxi company.

Daiko is a company that is similar to a taxi with the difference being; you can drive your car to a bar, club or restaurant of your choice, have a drink and the Daiko company will come pick you and your car up and drive you to your intended destination.

The Daiko taxi companies that are taking part in this service have been authorized access on all installations island wide. This system is fully Automated so you don't need to remember any phone numbers.

Once connected you will be directed to select the area of your intended destination and you will be directly connected to a Daiko taxi company.

For convenience, we have provided a sticker that can be placed on your USFJ operator's permit (license) that includes important numbers you can use in emergency situations. Anyone that has had **ANY** alcoholic beverage need only remember one phone number: **Daiko Direct**
